### **Mitchell Telecom Launches Support Site**

Customers have a new resource when it comes to questions regarding their Mitchell Telecom services. In conjunction with the launch of a new corporate website came the addition of a support section complete with knowledgebase / frequently asked question (FAQ) capability. Customer's logging on to the site can troubleshoot their Phone, Internet and Cable TV services and have access to those items 24 X 7.

Mitchell Telecom completed construction of a state-of-the-art communications network to provide high-speed Internet, digital cable television and telephone services throughout the city of Mitchell in 2006. Mitchell Telecom is a wholly owned subsidiary of Santel Communications, a cooperative that has been providing communication services to its member owners in southeast South Dakota for over 50 years.
